# Abdurrohman Azis

React Dev - Dicoding Indonesia | Informatics Engineering Student at  
Banten Jaya University  
Kota Serang, Banten, Indonesia

## Ringkasan

I am a Bachelor of Informatics Engineering student at Banten Jaya University. I have a strong interest in Web Development, especially Front End Development using React Js. My skills include problem solving, critical thinking, time work, time management, and a desire to explore new knowledge.

---

## Pengalaman

### Dicoding Indonesia

React Developer (Studi Independen)  
Februari 2024 - Present (4 bulan)  
Bandung, Jawa Barat, Indonesia

- Learn and apply the material learned by doing the assignment at the end of the module.
- Develop a React-powered NotesApp SPA website and incorporate APIs.
- Build a ForumApp website using Redux and React, and connect it with APIs.

### Binar Academy

Frontend Developer (Studi Independen)  
Agustus 2023 - Desember 2023 (5 bulan)

- Slicing the UI design from Figma into Bootstrap code results in a responsive website.
- Developed a ToDo List Website with CRUD capabilities utilizing Tailwind CSS and React Js to complete the task.
- Building a Movie Rating Website in collaboration using Git with the team. Using React Js and Tailwind CSS, integrating with the Restful API, and implementing Redux state management.
- Collaborate in developing the Course Web using Git with the Front End and Back End teams. Used Tailwind CSS, React Js, implemented Redux state management, and integrated with APIs from the Backend team as part of the final project completion.
